

Leonilo P. Lagman Jr.

Full Stack Developer | AI-Augmented Engineering | MVP Builder | DevOps | Exploring VR & Emerging Tech

leonilojrlagman@gmail.com

(+63) 915-142-8187

Professional Summary

Full Stack Developer experienced in designing, developing, and deploying scalable web applications using the MERN stack (MongoDB, Express.js, React.js, [Node.js](#)). Served as a Full Stack Developer at the Office of the President – Climate Change Commission (CCC) of the Philippines for five years and developed internal systems and websites to improve efficiency, transparency, and data accessibility. Mainly worked as a Project Lead, engaging with various stakeholders and presented different projects to possible investors. Excellent in building quick prototypes or MVP, passionate in discovering new and upcoming technologies and able to adapt to new tech quickly. Experienced in usage of the latest AI tools to supplement programming and automate testing and debugging of code, and created an owned AI agent.

Proficient in DevOps, dockerized deployment, and remote collaboration using Git-based workflows and CI/CD pipelines. Passionate about clean, maintainable code, problem-solving, and delivering high-quality solutions in distributed team environments. Explored VR technology development and optimization, including but not limited to network optimization, haptic technology, camera sensor tracking, and more. Experimented Integration of VR technology with my current programming workflow.

Technical Skills

- Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Bootstrap, Responsive Design, React Native, Vue Native, Angular
- Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Mongoose, Python, Java, C++, C#, C, Django, Rust
- Database: MongoDB, Firebase (basic), SQL, Supabase
- DevOps & Deployment: Docker, GitHub Actions (CI/CD), Nginx, PM2, Render, Vercel, Railway
- Server & Infrastructure: Linux Server Management, Reverse Proxy, SSL/HTTPS Configuration
- Scripting & Automation: Windows PowerShell, Shell Scripting
- AI: Blackbox, Claude, Cursor, Ollama, OpenAI, Hugging Face
- VR & Game Tools: Godot 4, OpenXR, VR Optimization, Meta, Tridef VR

Projects

Multi-Vendor Marketplace (MERN Stack + Vercel + Railroad)

- Developed a scalable e-commerce platform with vendor dashboards, product listings, and secure transactions.
- Implemented REST APIs and containerized deployment workflows for reliability and easy scaling.

Task Quest Board App (MERN + JWT + Docker)

- Built a gamified task management system with authentication, user roles, and real-time updates.
- Deployed through CI/CD pipelines using Docker and Render for production efficiency.

Carbon Credit Trading Platform (Prototype)

- Designed a prototype system for web-based carbon credit trading.
- Developed REST API and UI logic centered on environmental sustainability applications.

AI Lead Generator and Auto Reply Bot (JS + Ollama)

- Designed a website with automated email replies using locally run AI models.
- Developed an automated system where the lead will be able to communicate with a robust AI chat bot that will be able to ask the necessary details needed by the company to speed up the booking.
- Integrated with Nodemailer and Ollama local model to minimize costs.

VR & Modding Projects

- Integrated OpenXR and TriDef3D for advanced VR rendering and compatibility.
- Optimized NVIDIA RTX settings and wireless VR performance for reduced latency.
- Developed and enhanced Skyrim VR mods to improve visuals, performance, and immersion.

Professional Experience

Office of the President – Climate Change Commission (CCC), Philippines

Full Stack Developer

January 2021 – February 2025

- Designed, developed, and maintained full-stack web applications supporting national climate policy coordination, data integration, and internal operations of the Climate Change Commission.

- Engineered scalable RESTful APIs and dynamic user interfaces using React and Node.js, significantly improving system usability, data accessibility, and workflow efficiency across departments.
- Designed system architectures for digital platforms and internal tools, aligning technical solutions with organizational and policy-driven requirements.
- Deployed and managed applications using cloud platforms such as Render and Vercel, ensuring reliable, scalable, and high-performance production environments.
- Developed and maintained WordPress-based websites utilizing a headless CMS architecture, enabling flexible content management and modern frontend integrations.
- Created and delivered professional presentations to stakeholders and prospective investors, effectively communicating technical concepts, project viability, and business value propositions.
- Researched and presented emerging technologies, including blockchain-based carbon credit trading systems, highlighting opportunities for transparency, traceability, and innovation in climate finance.
- Collaborated with cross-functional and interdisciplinary teams in a remote setting, leveraging GitHub, version control best practices, and asynchronous communication to deliver timely and reliable system updates.
- Automated internal processes and digital workflows, reducing manual workload and enhancing reporting accuracy for inter-agency coordination and decision-making.
- Developed and integrated local AI agents using Ollama and Hugging Face to support intelligent data processing, automation, and exploratory AI-driven solutions within government systems.
- Produced visual and communication materials, including posters and digital assets using Canva, supporting public engagement, internal communications, and project presentations.

Certifications

Information Technology Specialist in Java

Certiport - A Pearson VUE Business

Issued November 2022

Credential ID: nDsL-DwVc

Information Technology Specialist in Python

Certiport - A Pearson VUE Business

Issued November 2022

Credential ID: wX5MV-48Ja

Personal Projects

- Job Posting Application (MERN + Deployment)
- Video Window Tiler (Productivity Tool)
- WordPress Blog and Marketplace

- Godot 4 Game Prototypes
- PowerShell Automation Scripts
- AI Lead Generator
- AI Chatbots
- Gig Booking Website
- Mobile Financial Tracker

Soft Skills

- Excellent Communication in Remote Work Environments
- Independent and Self-Directed
- Strong Problem-Solving and Debugging
- Collaborative with Cross-Functional Teams
- Adaptable and Continuously Learning
- Leadership Skills
- Excellent Presentation Skills
- Proficient in Learning New Technologies
- Proactive Mindset to build and solve problems quickly
- Strong ability to communicate and explain technical ideas
